INSTRUCTIONS FOR YOUR ULTRASOUND EXAMINATIONS

- A full bladder is required for pregnancy scans. You do not require a full bladder for gynaecological scan unless a transvaginal scan can not be done due to any particular reason.
- Please bring this request form with you on the day of your appointment.
- Bring previous scan images/reports if there are any.
- We suggest you arrive 15 minutes prior to your appointment.
- Most gynaecological scans are best done from Day 5 - Day 11 of your cycle counting from the first day of your periods.

Your doctor has recommended that you use Perth Obstetrics & Gynaecology Ultrasound. You may choose another provider but please discuss this with your doctor.
